I need help in performing an FMEA of my failed IELTS speaking exam 4x in a row so that I can prepare for the test properly and pass the next time.

Known facts.

1. I know the answer to the question but I cannot formulate a good response to answer the question correctly
2. Sometimes I go blank
3. My vocabulary is very limited in time of speaking but in writing, I'm fine.
4. I feel intimidated with the tester.

Perform an FMEA of my failure and create a workable solution for me to prepare and pass the test. Make the task list be very objective.
